

## Drinking Water From Air

A revolutionary technology that harvests pure drinking water from air! Enjoy pure drinking water that operates on condensation principle and exceeds stringent potable water quality standards of the World Health Organisation (WHO) and the Environment Protection Agency (EPA).

Available in portable dispensers for rapid deployment anywhere as long as there is an electrical socket. No water mains needed. Ideal for home, office and resort function room use. Convenient solution for humid areas, islands, mobile and remote operations.

- No water piping required. Only Voltage AC 115V/220V
- Hot and cold water tap dispensers for all round water availability.
- Operation Wattage 600-990W
- Heating Wattage 450W
- Production capacity 24 litres a day (for 30 degree Celsius, 60% humidity)
- Humidity range 20-95%
- Dimension 33 (W) x 40 (D) x 120 (H)  
Weight 48kg

## How You Benefit

- ◆ Free of piping and expensive water mains infrastructure
- ◆ Mobile water solution – just plug into any electric socket and drink away!
- ◆ Compact, elegant and ideal for home, office and resort use
- ◆ Energy efficient
- ◆ Good quality and taste
